- Offering concept to completion of a vast range of shading & sheltering products

PRODUCT

Blinds or curtains are mostly used to cover windows & door panels.

What if the blinds can be insulated within a Double Glazed Unit (DGU), and that in itself becomes a window or a door?

It would mean accentuating the beauty of the openings and make it permanently visible; not hidden behind shabby curtains.

Moreover, the blinds within the DGU do not get stained and are forever maintenance-free. There's privacy at your command.

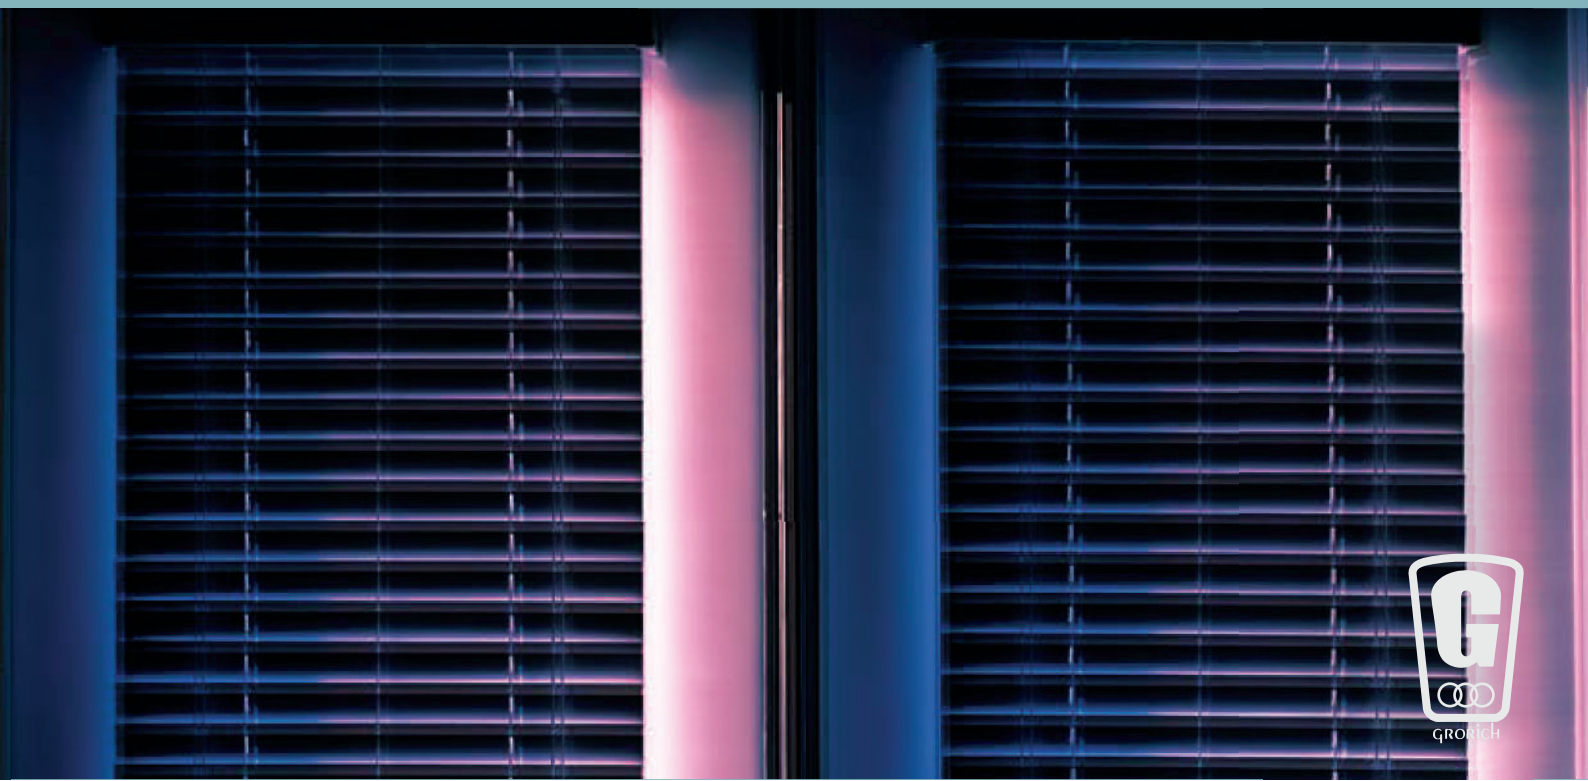

Enhanced acoustic and thermal insulation. And a space saver, too.

What more could one wish for?

Oh, but there's more. Convert any portico or balconies into a makeshift room as per your wish. Just slide the doors and close the blinds, and voila, there's a new room at your disposal.

No approval of any sort is needed from the local authorities for this room.

It's a hidden treasure island!

ALUMINUM VENETIAN

Venetian Blinds within double-glazed units & hermetically sealed are simple to maintain, and are safe from dust and dirt. It also acts as an insulation from noise, heat & cold from the outside. They allow an open plan feel to the space whilst still ensuring shade and privacy when needed.

MANUAL – No Strings Attached

- A totally cordless Tilt & Lift system operated via sliding magnetic blocks.
- This simple-to-use controls are located around the perimeter of the unit with the full lifting operation
- The tilt function on the venetian variant allows you to set the privacy and shading to your specifications.

MOTORISED – Switch to Remote

or

- Using either a switch or a remote to achieve complete privacy or exposure at a simple touch.
- Holding down the button operates the tilt function, allowing you to decide your perfect shading position.

MANUAL KNOB - Tilt-Only

User friendly, robust and versatile, Horivert offers a simple knob-control that is the minimalistic solution for manual operation. This system enables lighting levels to be simply and directly managed according to your needs and preferences. Easy to install, this double glazed blind can be adjusted by simply turning a knob, which opens and closes the slats.

FABRIC HONEYCOMB

These soft and double layered fabric blinds are aesthetically pleasing and offer an air of elegance. A salient feature is the room darkening function by using our blackout honeycomb fabric. Get that unparalleled darkness for your home theatre.

MANUAL – No Strings Attached

- A totally cordless Lift system operated via sliding magnetic blocks.
- This simple-to-use controls are located around the perimeter of the unit with the full lifting operation

MOTORISED – Switch to Remote

or

- Using either a switch or a remote to achieve complete privacy or exposure at a simple touch.

SKY-ONLY-VIEW - Bottoms Up!

Our motorized bottom to top honeycomb blinds makes you feel like "Your Majesty". Bid adieu to your neighbors and say hello to your nature friend - sunshine or moonshine! Get that perfect sky-only-view by blocking out everything except what your eyes wish to see. Available in 25mm honeycomb blind.
