

HORIVERT Double Glazed (DG) Smart Blinds

Haven't you always installed blinds or curtains in front of your windows or door panels? What if the blinds are insulated within DGU doors and windows! It would mean accentuating the beauty of your homes and not be hindered by the shabby curtains or blinds anymore. The blinds within the DGU do not ever get stained and are forever maintenance free. Save space. Control privacy as per your wish - you may choose whether you want partial vision or complete black out. Heat and noise insulation is another benefit. What more could you wish for? Oh, but there's more. You may convert any portico or balconies into a makeshift room as per your wish. Just slide the doors and close the blinds, and voila, you've a new room to use as per your wish. Your wish is our command. No approval of any sort is needed from the local bodies for this room. It's a hidden treasure island!

Windows normally allow you to see as well as to be seen. However, sometimes, it may be desirable to be shielded from prying eyes. Horivert Privy glass offers you this privacy at the flick of a switch. A unique technology of Horivert Privy glass allows it to be switched from an ordinary looking clear glass to a translucent glass ensuring optimal vision control. All it takes is a simple electrical switch to turn your privacy on. Privy glass is a switchable glass that features two panes of glass, two sheets of interlayer films and a PD-LCD layer. This laminated structure give Privy Glass not only an aesthetically inspiring glass to view through but also offers a full Grade-A safety glass.

HORIVERT Privy Smart Glass

HORIVERT Smart Zipscreen

Horivert Smart Zipscreen is the ultimate external screening solution for any outdoor area or window. Specially designed for alfresco entertaining areas such as pergolas, verandahs, and balconies, it offers privacy and protection from the sun, wind, rain, and insects all year round. Also ideal for home and office windows, it serves as a sleek, secure, and durable alternative to traditional awnings & outdoor roller shutters. Your custom designed system can be made in widths of up to 6 metres or drops up to 6 metres, offering you an external solution to fit almost any area.

Horivert Pergoshade is an innovative cable sun shading system developed by GRORICH to protect users from adverse solar effects at open terraces, swimming pools, outdoor cafés & restaurants without the need of heavy steel structures.

HORIVERT Pergoshade - Indoor & Outdoor Sun Shading

Our Pergoshade can span to a width of 5mtr and travel to a length of 18mtrs [covering area 90sqmtr.] with a single motorized drawing-system on guided cables and pulleys. The system is fixed to the opposite ends and the cables link the two ends to facilitate the travel of the flat or festooned fabric in panel widths ranging between 450 to 600mm.

An ideal shading solution for large open areas where style, durability and comfort are of paramount importance.

HORIVERT Louvers

Ventilation isn't a restriction. It's an opportunity. Horivert louvers let architects do what they've always wanted to: defy traditional airflow design conventions to achieve their true vision—without sacrificing performance. Whether you want your louver to be a major design element or simply disappear into the facade of your building, Horivert has options that will work beautifully.

Allow the warm morning sun rays in and keep the harsh UV rays out. Allow fresh air in and keep wind-driven rain out.
